

General Information

All marine plywoods from Robbins Timber are exclusively manufactured to our specifications, and are of the highest quality, and approved under one or more of the following respected standards: BS1088, Lloyds Register Type Approval, PS1-95, KOMO Class 'A' or 'C'. The fact that one board has a standard which another of our boards lacks does not necessarily mean the quality is better or worse, it is usually an indicator of which management system our producing mill is working to. All our marine plywoods are made in mills which have been inspected personally by our directors, and carry our own guarantee of quality. If a particular standard or approval is critical for your project, please let us know at the time of order which you require. We are always happy to discuss which is the appropriate board for your project.

Full details of the above standards are available on request.

ROBBINS SUPER-ELITE PLUS

BS1088 Marine Plywood **Guaranteed for 25 years**

This is our top-of-the-range board! It is made from multi-laminate mahogany veneers for stability, and has extremely high quality Rotary Sapele faces. Designed for high loading uses where strength is a pre-requisite, it has a superb face veneer quality, and the decision to use this board or our Robbins Super-Elite (see below) should be purely based on aesthetics. Both Super-Elite and Super-Elite Plus are extremely resistant to fungal attack and are ideal for persistently wet and dry environments. Used and approved in high risk applications, and manufactured to BS1088, KOMO Class 'A', 'C' and Lloyds certified.

Cost: **Medium to High**

ROBBINS SUPER-ELITE

BS1088 Marine Plywood **Guaranteed for 25 years**

Robbins Super-Elite is made from multi-laminate mahogany veneers throughout for durability and stability. Faces are manufactured using specially selected 'A' grade veneers. As with our Super-Elite Plus, it has a superb face veneer quality. Super-Elite is extremely resistant to fungal attack and is ideal for persistently wet and dry environments. Used and approved by the RNLI in high risk applications. Manufactured to BS1088, KOMO Class 'C' and Lloyds certified.

Cost: **Medium to High**

ROBBINS ELITE

BS1088 Marine Plywood **Guaranteed for 15 years**

Our best selling board! Exclusively produced to our specification, ROBBINS ELITE is produced in a Lloyds approved mill ensuring consistent quality. With a pale mahogany colour, it is ideal for fitting out and general constructional work, along with many other uses such as bulkheads, panelling, cabin and shower doors etc.. Manufactured from selected Gaboon (Okoume) veneers throughout, it has an attractive close grained face which is ideal for varnishing and finishes well. Due to its excellent strength to weight ratio, it is also very popular for dinghy construction and racing boat building.

Cost: **Medium**
